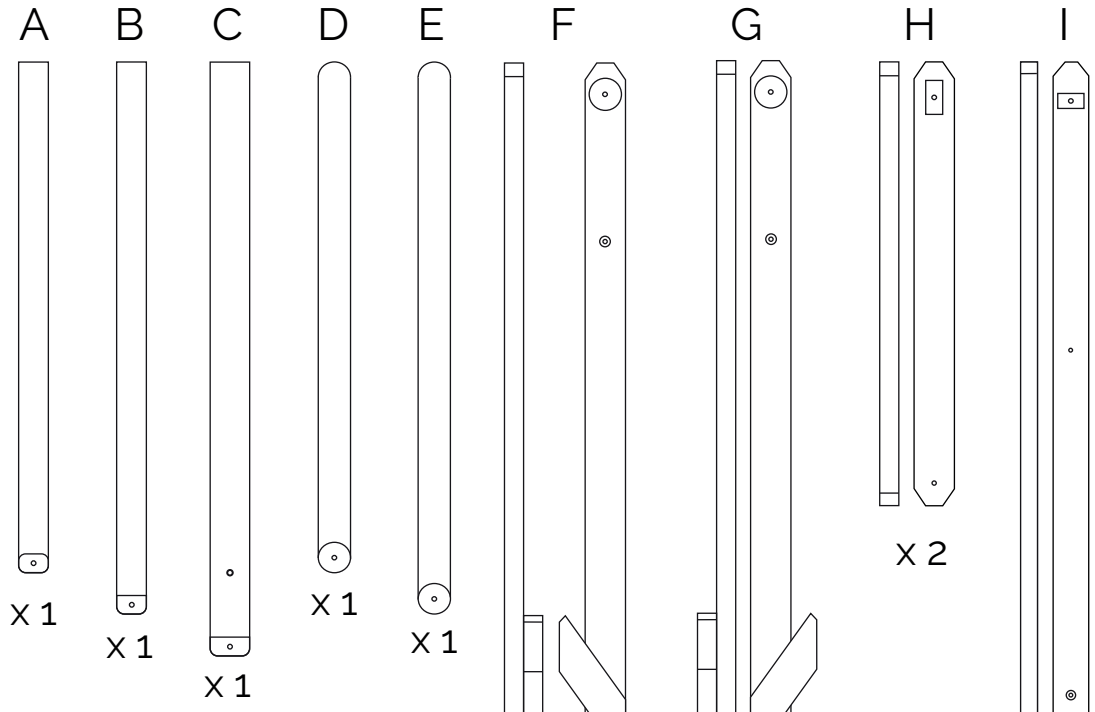
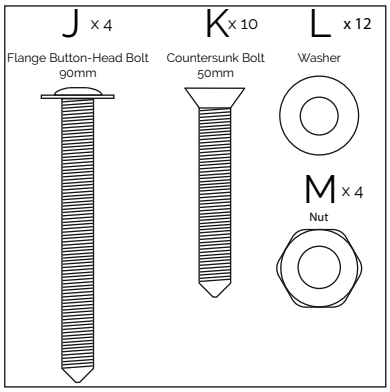
giant deckchair assembly instructions

giant deckchairs & friends





A= Inner Back Brace
B= Outer Front Brace
C= Prop Brace
D= Bottom Pole
E= Top Pole
F= Left Inner Leg
G= Right Inner Leg
H= Prop
I= Outer Leg

Tools required
1x 17mm socket spanner
1x 6mm hex key

Frames are loosely assembled prior to dispatch. If pieces don't fit one way, they will fit the other way. Markings may be added to help.

1. Arrange **Left Inner Leg F**, **Right Inner Leg G**, both **Outer Legs I** and both **Props H** as shown in Fig. 1.

2. Insert **J Bolt** through **Prop H**. Slide two **L washers** onto the end of **J Bolt** and then insert end of **J bolt** into **Outer Leg I**. Slide one **L Washer** onto the end of **J Bolt**, hold bolt in place with a 6mm hex key and secure with an **M nut** using a 17mm socket (**Fig. 2**)

3. Repeat step 2 to attach the **Outer Leg I** and **Prop H** just secured, to **Inner Leg F**.

4. Repeat Step 2 to attach the second **Prop H** to the other **Outer Leg I**.

5. Repeat Step 2 to attach **Outer Leg I** to **Right Inner Leg G.**

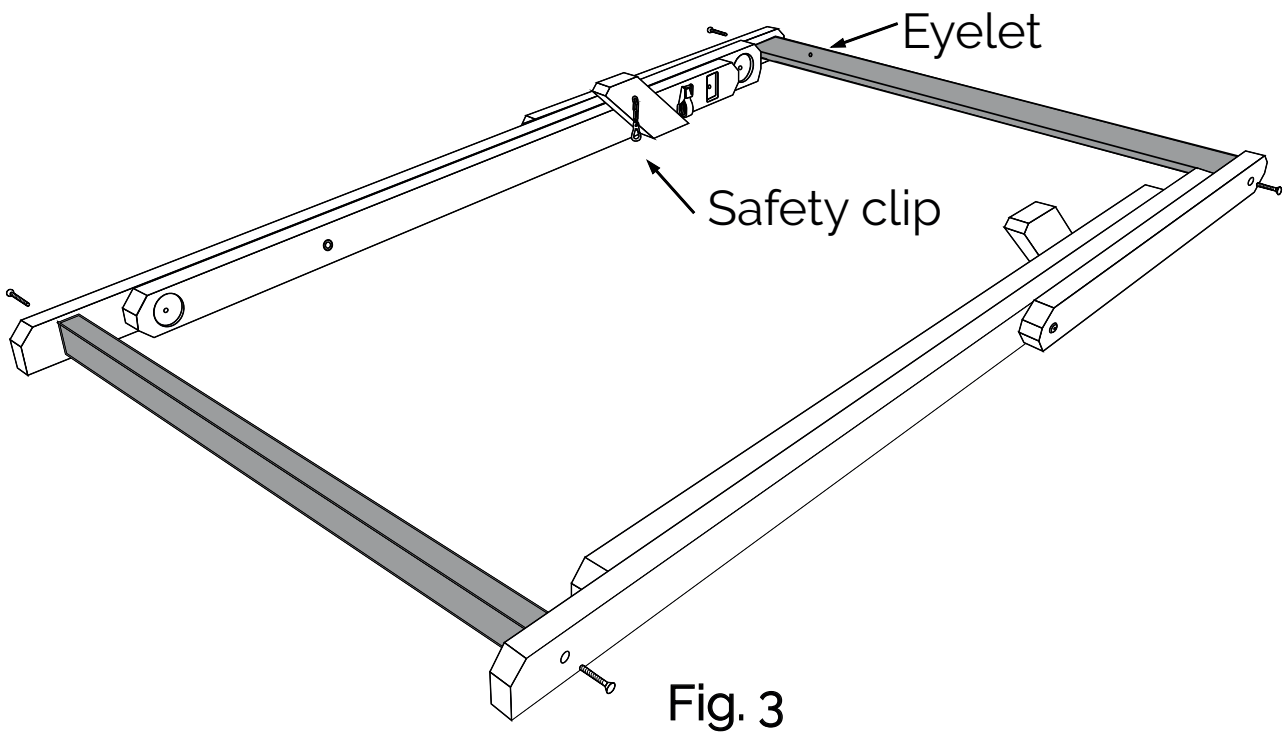

Fig. 3

6. Position **Prop Brace C** so the eyelet is pointing upwards and on the same side as the safety clip, see **Fig. 3**. Fit both ends of **Prop Brace C** into the corresponding recesses of the **Props H**. Insert one **K Bolt** through each **Prop H** and tighten so the brace fully sits in the back of the recesses.

7. Fit both ends of **Outer Front Brace B** into the corresponding recesses of **Outer Legs I**. Insert one **K Bolt** through each outer leg and tighten so the brace fully sits in the back of the recesses.

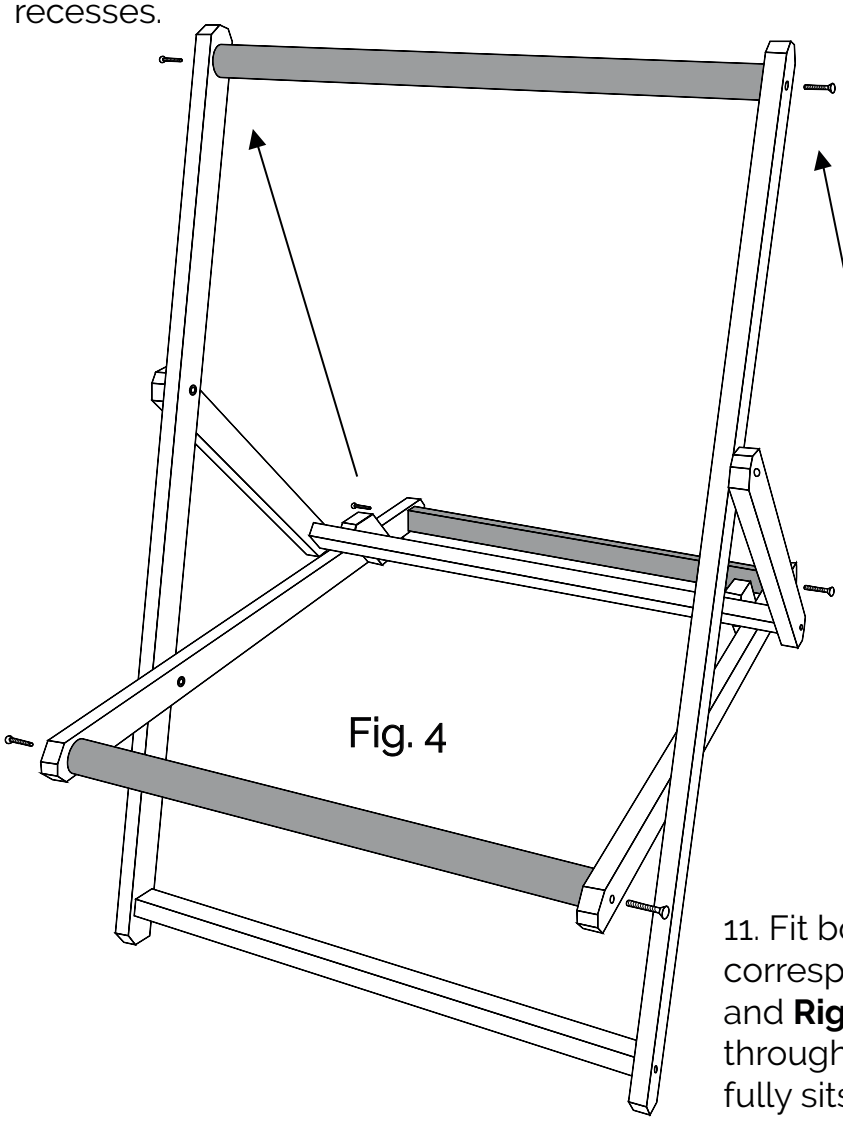

Fig. 4

8. Ask another person for help to unfold the chair. Standing on the outside of the frame lift **the ends of Outer Legs I** upwards. Guide **Prop Brace C** over and infront of the stays attached to **F** and **G**.

9. Fit both ends of **Inner Back Brace A** into the corresponding recesses of **Left Inner Leg F** and **Right Inner Leg G**. Insert one **K Bolt** through each inner leg and tighten so the brace fully sits in the back of the recesses.

10. Fit both ends of **Top Pole E** into the corresponding recesses of the **Outer Legs I**. Insert one **K Bolt** through each outer leg and tighten so the pole fully sits in the back of the recesses.

11. Fit both ends of **Bottom Pole D** into the corresponding recesses of **Left Inner Leg F** and **Right Inner Leg G**. Insert one **K Bolt** through each outer leg and tighten so the pole fully sits in the back of the recesses.
